This article will help you in integrating Internet Download Manager program with all popular web browsers so that you can download files from Internet faster using IDM. To integrate IDM with your web browser, you'll need to install and add its extension called "IDM Integration Module" in the browser.What is IDM Integration Module Extension? IDM Integration Module is the name of a browser extension installed by popular 3rd party download management software Internet Download Manager (IDM). It is added by IDM in web browsers to integrate itself with the browser. This extension can be used in all web browsers such as Internet Explorer, Google Chrome, Mozilla Firefox, Opera and the new Microsoft Edge browser.When you install IDM program in your Windows computer, it automatically integrates itself with all popular web browsers. It adds its extension in all installed web browsers in your computer system. The "IDM Integration Module" extension helps IDM in bringing its functionality to all popular web browsers. When you try to download a file in your web browser, IDM takes over the download from the web browser.Sometimes IDM fails to integrate itself with installed web browsers. It can't install its extension in your browser, as a result you can't use IDM to download stuff from websites.Recently I faced similar issue in my Windows PC when I installed IDM and it didn't integrate with any web browser. After some troubleshooting, I was able to fix the IDM integration issue and I decided to create this tutorial to help other IDM users.Today in this tutorial, we are going to address following issues related to IDM integration with web browsers:You installed IDM in your computer but it didn't integrate with your favorite web browser. As a result, you are unable to use IDM in your browser. You can't download anything using IDM in your browser.You upgraded IDM to a new version or upgraded your web browser to a new version and IDM stopped working in your browser. IDM integration no longer works in your browser.You upgraded your web browser to a new version and it disabled IDM extension because it was incompatible with new browser version.You checked extensions/add-ons page in your web browser and it doesn't show "IDM Integration Module" extension in the list.Although "IDM Integration Module" extension is present on browser's extensions page but not working in your web browser because the extension cannot contact the main IDM application.IDM doesn't support your web browser or your web browser doesn't support IDM. In such case, you'll need to forcefully integrate IDM with your browser.How to Install IDM Integration Module Extension AutomaticallyThe solution of all above mentioned problems is integrating IDM with your web browser. We can add or install the missing "IDM Integration Module" extension in all web browsers to fix IDM integration and IDM will start working in your web browsers.If you also want to integrate IDM (Internet Download Manager) with your favorite web browser, following steps will help you:1. First of all make sure that you are using the latest version of IDM in your computer. Open IDM and click on "Help -> Check for updates" option. If you are using latest IDM version, it'll show "You are using the latest version of Internet Download Manager. Please check back again for updates at a later time." message. If you are using an older version, it'll start downloading and installing the latest version and will update your IDM to the latest version.Updating IDM to the latest version may fix the integration issue and all kind of error messages as IDM team fixes known issues in newer versions automatically. Updating to latest IDM version may also fix compatibility issues as newer IDM versions come with support for new web browsers as well as newer versions of all popular web browsers.Once you update IDM to latest version, it may also install the missing IDM Integration Module extension automatically which will integrate IDM in your browser.2. Now click on Downloads -> Options menu in IDM and in General tab, make sure "Use advanced browser integration" option is enabled.If it's unchecked, enable the option. If the option is already enabled, first uncheck the option and then re-check the option. When you'll uncheck the option, IDM will show you following message:You have turned off advanced browser integration. If you found a problem with advanced browser integration, we would like to fix the problem for you. In order to fix the problem, we need to collect and analyze some technical information about your computer configuration and installed Internet applications. IDM will collect and show you this information on the next stage before sending it to our support department. Would you like IDM to generate this information?Click on No button.3. Also make sure your web browser is enabled under "Capture downloads from the following browsers" list. Click on OK button to close Options window.Now check in your web browser and the missing "IDM Integration Module" extension should be added now.How to Add IDM Integration Module Extension ManuallyIf the above mentioned method doesn't work in integrating IDM, you may also need to manually add missing IDM Integration Module extension in your web browser to properly integrate IDM with the browser. Following methods will help you in manually installing missing IDM extension in all popular web browsers:How to Install IDM Integration Module Extension in Google ChromeFollowing steps will help you in adding IDM Integration Module extension to Chrome:1.
